Introduction

Backend Software Engineer. 4+ years of professional experience building and consuming REST APIs and integration services in C# (.NET) and Python.

Systems integration focus. connects third-party carrier, ERP, and internal services through REST APIs and message-based pipelines.

Data layer. relational schema design and complex SQL across PostgreSQL and SQL Server, backing customer reporting and regulatory extracts.

Industrial Experience

Software Engineer

Acme Corp

Jan. 2024 – Present

Sydney, Australia

Stack C#/.NET, Python (FastAPI), REST APIs, PostgreSQL, SQL, Docker, GitHub Actions, Azure, React

- Designed and built REST APIs in C#/.NET and Python/FastAPI that integrated external carrier and ERP systems into the shipment-tracking platform.
- Modelled PostgreSQL schemas and authored complex analytical SQL queries powering customer-facing reporting dashboards.
- Built and maintained GitHub Actions pipelines for build, test, and containerized deployment to Azure, removing manual release steps.

Junior Developer

Globex Pty Ltd

Feb. 2022 – Dec. 2023

Sydney, Australia

Stack C#/.NET, Python, REST APIs, SQL Server, JavaScript, Docker, Azure DevOps

- Developed REST API endpoints in C#/.NET for the claims-intake service, consumed by internal web and mobile clients.
- Wrote SQL Server stored procedures and queries for claims data extraction and regulatory reporting.
- Automated data-migration and reconciliation work with Python scripts, replacing a manual spreadsheet process.

Education

Example University

Bachelor of Computer Science

2018 – 2021

Sydney, Australia

Skills

Core Languages C# (.NET Framework / .NET Core), Python, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks & Libraries ASP.NET Core, FastAPI, React, Node.js

Tools, DevOps & Cloud Docker, GitHub Actions, Azure DevOps, Azure (App Service, Blob Storage), Git/GitHub, pytest, xUnit
